CT350 Banknote Detector

Professional banknote detector

CTcoin has developed an accurate and reliable banknote detector, named CT350. The machine is both unique and very modern in its design. CT350 is easy to use and suitable for any environment.

The detector comes in 2 versions:

- Multi currency banknote detector (Software available for most currencies)
- A model only suitable for EURO notes

Detection technologies:

- UV - scanning the ultraviolet properties of the bill
- MG – Magnetic ink detection
- MT - Magnetic thread counterfeit detection
- IR - Infrared counterfeit detection
- Paper quality detection
- 2D size detection

Special features:

- Approved by the European Central Bank
- Counts up to 6 currencies, with different denominations
- 12 digits LCD display with blue backlight
- Audible alarm when detecting counterfeit note

Technical specifications:

- Detection speed: <0.5 second per note
- Accepts multiple currencies inserted from all 4 possible angles into the machine, for example: EUR, GBP, DKK and NOK
- USD and CHF notes are only accepted from 1 angle
- Ambient humidity: 25-80%
- Power source: DC9V or 7.5V Lithium battery (optional)
- Power consumption: 5W

Dimensions:

Length:	143 mm
Depth:	125 mm
Height:	73 mm
Weight:	0.6 kg
