## CRANE CoinTransporter

### Coin transporter

#### New and cost effective coin transporter

CTcoin is proud to introduce the new Crane coin transporter for bulk coin handling. The Crane coin transporter is the most cost-effective solution for transporting coins on the market. The reliable construction together with an adjustable coin stop (with sensor) secures optimal operation time in conjunction with professional medium to high speed coin counters/sorters.

#### A reliable coin transporter for bulk coin handling

The Crane is an important component of an automated coin counting and sorting process. The Crane offers unmatched cost effectiveness combined with reliability and ease of operation. This makes the Crane a valuable asset in any automated coin counting and sorting process for heavy duty.

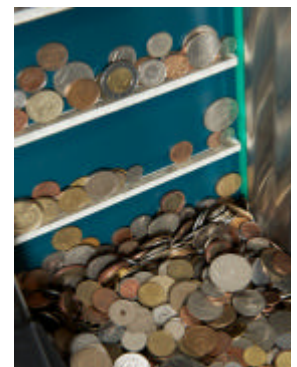

#### Features:

- Removable dirt tray
- Easy click-off coin head
- Adjustable coin stop(with sensor) by delay function
- Adjustable speed function
- Adjustable coin bucket, which holds 17,8 l of coins

#### Advantages:

- Speed: Up to 3500 coins/minute
- Cost effective
- Reliable and ease of operation
- Low maintenance
- Adaptable/Compatible with a wide range of professional medium to high speed coin counters/sorters

#### Dimensions:

Length: 1072 mm  
Depth: 413 mm  
Height: 1543 mm  
Weight: 68 kg
